PROJECTS

SendExpressCourier  | **Java, Firebase Authentication, Android Studio Jan-2024**

This Android app is a courier service platform designed to make delivery management simple and secure. Users can register, log in, and book courier services by entering details like sender and receiver information. They can track their shipments in real-time using AWB numbers and upload proof of delivery through images or signatures.

QueenOfHearts (Game App)  | **Core Java, XML, Android Studio Aug-2023**

This game is for picking up the cards and winning the corresponding prize associated with the card. Users have a Playing cards grid and one lucky customer got a chance to pick up the card from the grid.
